## Introduction

The changing conditions of modern living almost demand alternative spaces.

Environmental awareness is becoming more and more part of our everyday lives, while the code at work inside us also intensively feeds the desire that drives us to where we came from:

### **Back to nature!**

NanoHouse was established, with its high quality nanohouses, to create close-to-nature places of experience. On the following pages, we present the brands that we distribute and manufacture in Hungary.

## Disconnect to connect!

This is what the Estonian ÖÖD claims,  
who created the world's first prefabricated  
mirror houses that can be installed anywhere.  
The innovation of ÖÖD lies in the fascination of  
the reflective glass, thanks to which the houses  
blend into nature in an astonishing way.

Hotel room on the edge of the forest with  
a private sauna. A private office at the end of our  
garden. Maybe a gym or a complete wellness  
space to relax in.

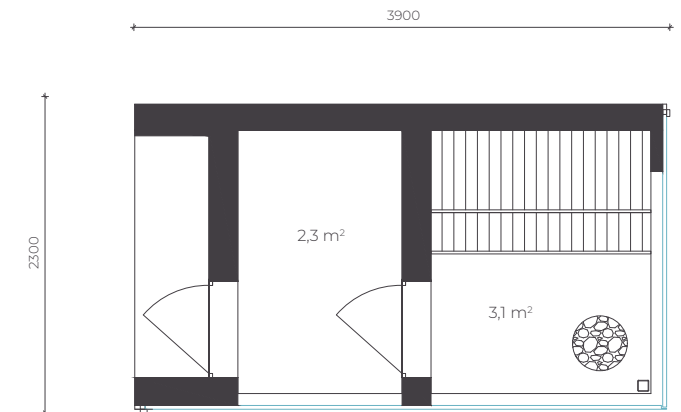

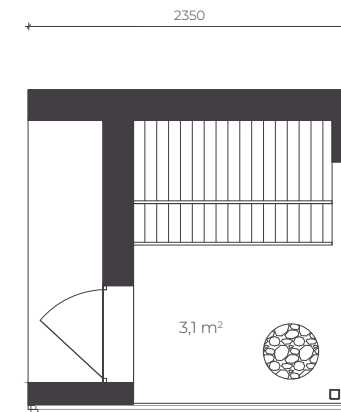

We believe in the highest quality,  
be it about anything.

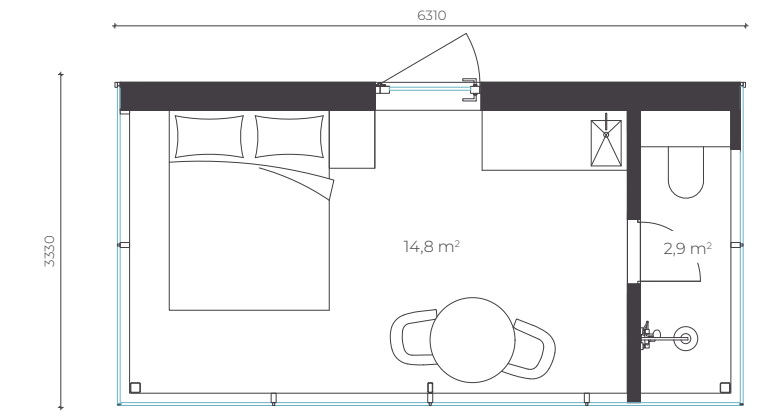

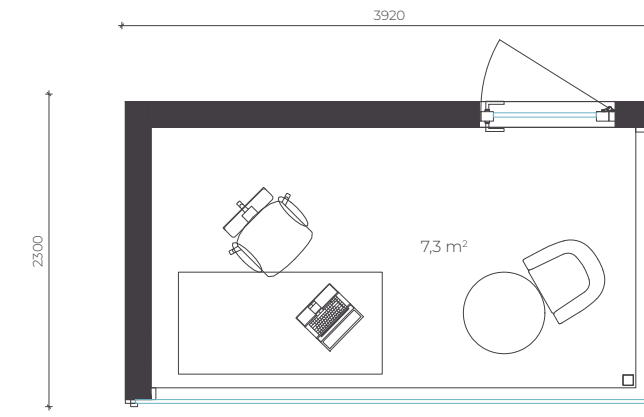

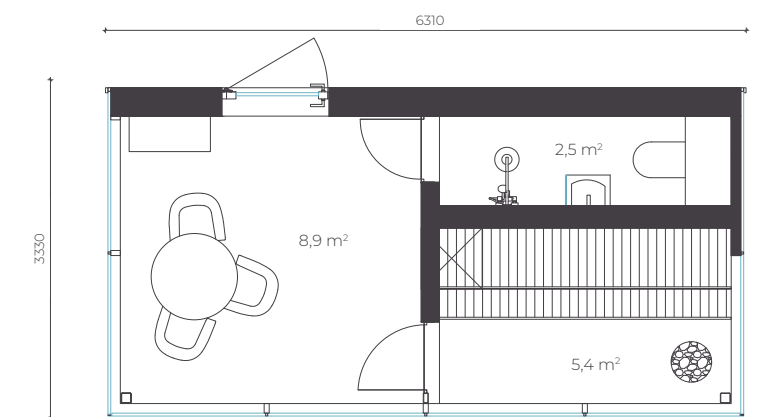

Our decisions are fundamentally  
determined by a sustainable approach.

# KOTO

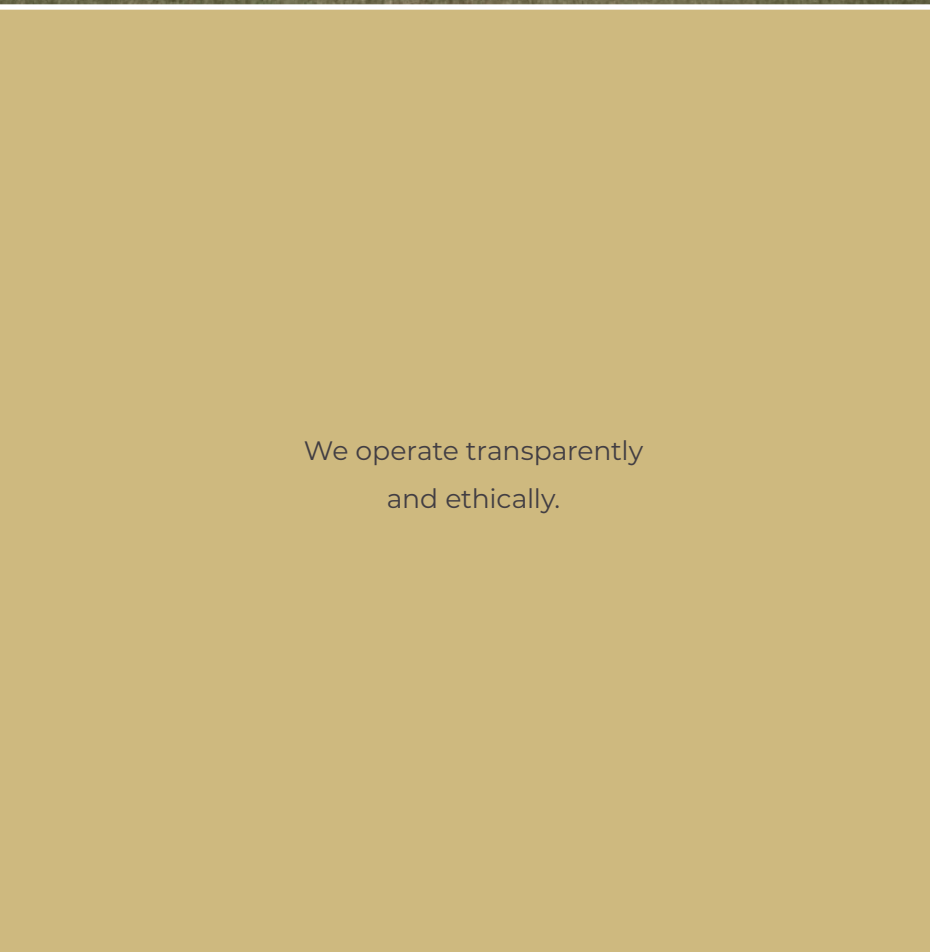

We exclusively work together  
with the best for our own  
manufactured nanohouses.

## Scandinavian inspiration, japanese minimalism

Scandinavian inspiration, japanese minimalism  
and sustainability at any price. KOTO nanohouses  
represent impeccable quality, all houses are carbon neutral.  
Whether it's home office or meditation or a creative space  
with our children. NanoHouse is the proud hungarian  
manufacturer of the iconic Sculpture Cabin of KOTO and  
at the same time a fan of KOTO philosophy.

## Simplified and modern

Jay is a space for in-depth work.

It is a 15.3 m2 meeting room, office or podcast scene, inspired by technology.

This forward-looking, innovative character is not only given by its function, but also by its external appearance, the steel covering of which is a gesture towards to the modernity. An important aspect of its design was to provide space for coworking locations by placing several similar workspaces in an infrastructural environment.

Modern office space  
for meetings, brainstorming  
and welcoming clients.

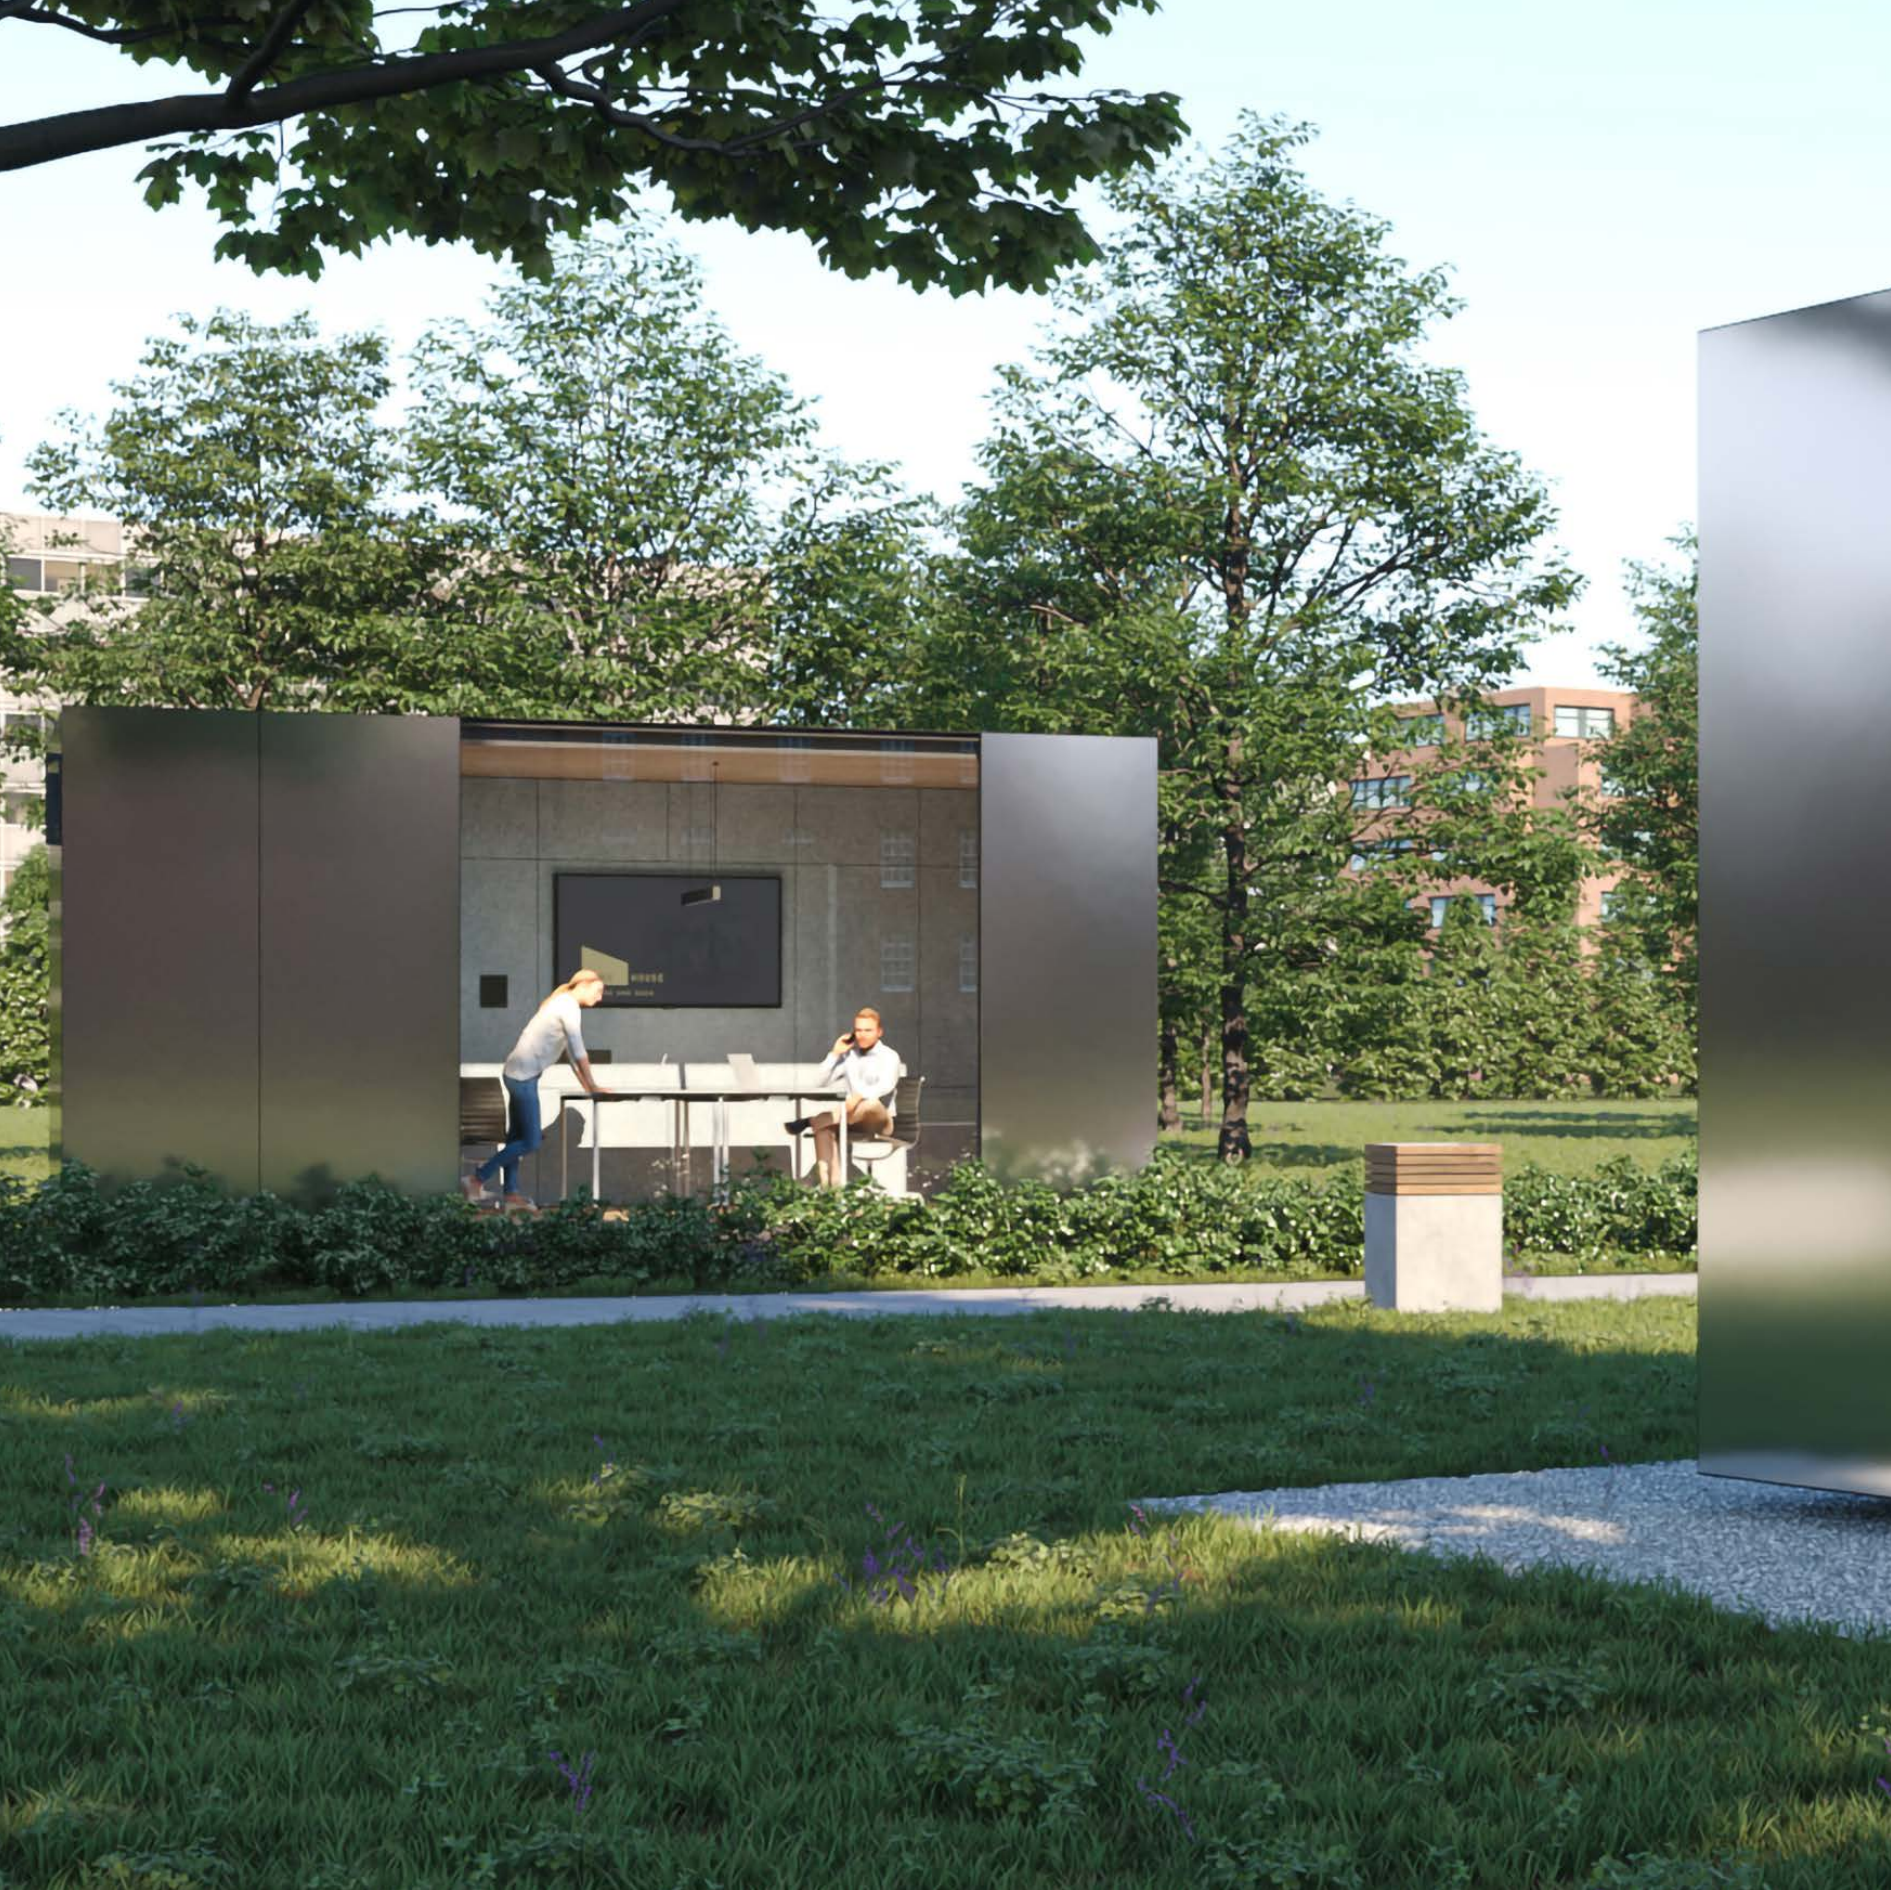

It brings nature  
within reach.

**USEFUL AREA :** 15,3 M<sup>2</sup>

## Inspired by the simple beauty of nature

Robin is an inspiring space in every sense. A hiding place, a safe nest where creativity can take wings. We can place it in our own garden, creating a living space suitable for retreat. Whether it's for creative activities, quiet listening to music or a playroom for children, Robin offers 7.8 m<sup>2</sup> of space for everyone who wants to recharge a little while enjoying the proximity of nature.

We adapt to  
modern lifestyles.

Play area, creative workspace  
or a room for relaxation.

HEIGHT : 3,5 M

USEFUL AREA : 7,8 M<sup>2</sup>

## We used materials with a pleasant feel

Lark's key element is tactile cork, which is a warm, soft leather-like material that is smooth and pleasant to touch. This delicacy makes it ideal space for those who practice yoga and those who want to enjoy silent meditation. On it's inner lining, a grey felt-like material improves the acoustics of the space and lends a warmth that is at least as pleasant to touch as a dress made of the finest fabric.

A livable, harmonious space  
in your garden.

We believe in  
an eco-conscious approach.

TOTAL SIZE : 5 X 3 M

HEIGHT : 3 M

USEFUL AREA : 12,5 M<sup>2</sup>

## Every detail radiates calmness

Pigeon's design was inspired by the peaceful view of the forgotten Hortobágy. We designed a hotel room with a floor area of 22 m<sup>2</sup>, which is ideal for relaxing and recharging. The façade of the nanohouse combines reed as a traditional element with the modern design provided by reflective glass. The exciting look hides a plastic-free interior. Pigeon can be a bright spot in any landscape, whether it is installed at lake Balaton's highlands or the sweeping plain of Hortobágy.

You will feel the breath of  
natural materials.

Reflecting the values of  
the forgotten Hortobágy.
