

Hikki

Back to nature!

It is time to slow down. Nature is no hurry. The Hikki bathtub helps us to find our way back to the human scale, so that we can learn to connect again with our natural environment. Let's chop wood, light a fire and feel the results of our work. Let's notice the miracles that surround us and enjoy an energizing rest of quality.

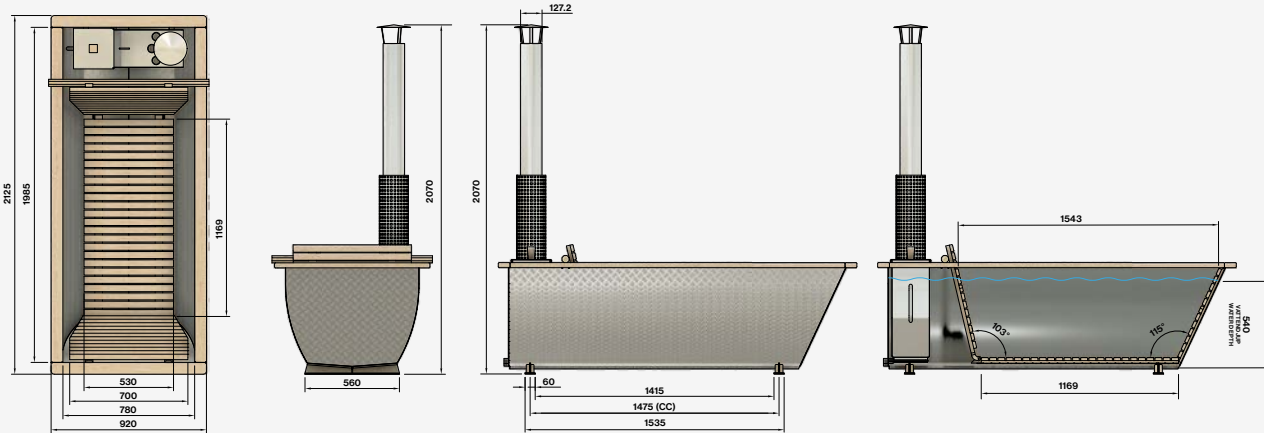

Natural simplicity, a Scandinavian feeling.

Let us picture an outdoor bathtub in the middle of the forest. We light the wood-burning stove built into the bathtub, and after an hour or two we slowly sink into the warm water while snow is falling around us. Let us allow our racing thoughts to calm down, let us focus on nature and enjoy the beauty of the moment. This experience can now be enjoyed in the garden of our own home or holiday home.

Why do we love the Hikki outdoor bathtub?

The Hikki bathtub will impress everyone with its unique design, use of high quality materials, its durability and longevity. Thanks to its small size and light weight, it's easy to move anywhere where traditional jacuzzis and hot tubs cannot be placed. As it needs little water to fill up, it has a fast warm-up time and is therefore economical to run. Its use and maintenance is simple and safe.

Hikki bathtub

- **Available space:** 2 adults and 1-2 child(ren) • **Heat up time:** 1,5/2,5 hours (summer and winter time)
